

Customer Success Story

A Leading **Financial Services** client increased user adoption by retiring **Informatica** and replicating all its **integrations with Mulesoft**

About the Client

The client is an expert provider of specialized custody solutions for alternative assets, investment accounts, and retirement funds.

Solution

DemandBlue team replicated integrations from Informatica to Mulesoft and the major functional add-on which DemandBlue provided is the addition of APIs that helps to trigger the integration On Demand, apart from the default scheduled runs on specific times.

Benefits

- ✓ **Customizability** – Higher level of customizability to the integrations compared to Informatica.
- ✓ **Salesforce Ecosystem** – Mulesoft now being part of Salesforce, helps in developing integrations that have Salesforce as an endpoint.
- ✓ **Easy to manage** – Deployment were programed to be configurable and updated through the Anypoint platform.
- ✓ **API** – With new APIs created for the replication process, the user need not wait for the schedule of a process and can run any specific process anytime
